

Relationships

To view the relationships of a study item, select the actions menu next to the item on the [Study Item List page](#) and select **Related Study Items**.

Note: The Related Study Items option will only be present if the study item has relationships.

The Related Study Items window will be displayed. This window includes information about the Item(s) that are related to the study item.

The Related Study Items window is most useful for quickly identifying which items are related and seeing their metadata.
