

Study Unlock

After a study has been locked, it can be unlocked. To unlock a study, navigate to the study's [Study Home Page](#) and select the Study Unlock option from the Action Menu.

This will open the Unlock Study window. A reason for unlock must be selected in order for the study to be unlocked.

A screenshot of a dialog box titled 'Unlock Study: RandomTest'. The dialog has a light gray background and a question mark icon in the top right corner. It contains a 'Reason for Unlock' section with a dropdown menu that currently displays 'Please select a reason for unlocking the study'. Below this is an 'Additional Comments' section with a large text input area. A red banner with the text 'This field is required' is positioned over the dropdown menu. At the bottom right of the dialog, there are two buttons: 'Cancel' and 'Unlock'.
