

Disassociate Document

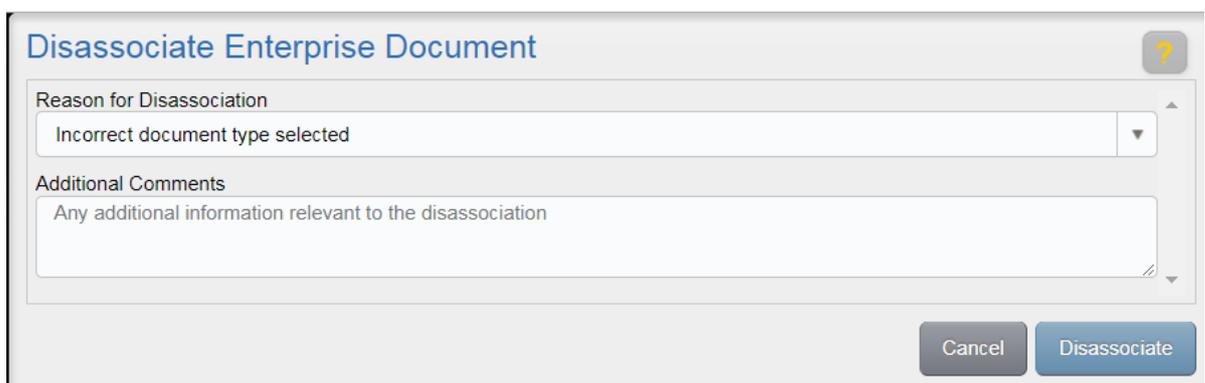

Enterprise

Use this process to remove the association between a Study and a [Enterprise Level Document](#) (e.g., if you chose the incorrect document type or the document does not apply to the study).

1. Navigate to a *Final* enterprise level document in the study item list.
2. Select “Disassociate Enterprise Document” from the associated Actions menu.

3. Select a Reason for Disassociation.

A screenshot of the 'Disassociate Enterprise Document' dialog box. The title bar reads 'Disassociate Enterprise Document'. Below the title, there is a 'Reason for Disassociation' dropdown menu with 'Incorrect document type selected' selected. Below that is an 'Additional Comments' text area with the placeholder text 'Any additional information relevant to the disassociation'. At the bottom right, there are two buttons: 'Cancel' and 'Disassociate'.

4. Enter any additional comments if necessary.
5. Click **Disassociate**. The study item will no longer appear as *Final* and fulfilled.
