

# Disassociate Program Document

Use this process to remove the association between a Study and a [Program Level Document](#) (e.g., if the wrong document type was selected or the document does not apply to the study).

1. Navigate to the program level study item in the study item list.
2. Select “Disassociate Program Document” from the associated Actions menu.

3. Select a Reason for Disassociation.

A screenshot of the 'Disassociate Program Document' dialog box. The title bar reads 'Disassociate Program Document'. Below the title, there is a dropdown menu labeled 'Reason for Disassociation' with the selected option being 'Incorrect version selected'. Below that is a text area labeled 'Additional Comments' with the placeholder text 'Any additional information relevant to the disassociation'. At the bottom right, there are two buttons: 'Cancel' and 'Disassociate'.

4. Enter any **Additional Comments** if necessary.
5. Click **Disassociate**. The study item will no longer appear as *Final* and fulfilled.
