View Versions of Document Templates, Workflow Definitions, or Workflow Task Definitions

To View the Version History for any Document Templates, Workflow Definitions, or Workflow Task Definitions, access the Actions menu associated with the object and select "View Versions."

The View Versions window will display the previous versions of the configuration and their metadata. Each version has its own Actions menu that allows you to:

- View Native Content (if not PDF)
- View PDF in Acrobat
- View PDF in Browser
- View metadata

If the Configuration has multiple pages of Versions, the pages of Versions can be changed by selecting the arrows at the bottom of the View Versions window.
